**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/US98/11069

I. Basis of the report

1. This report has been drawn on the basis of *(substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.)*:

Description, pages:

1-9 as originally filed

Claims, No.:

1-15 as originally filed

Drawings, sheets:

1/3-3/3 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. None of the documents, cited in the International Search Report, disclose a liner for storing unvulcanised elastomeric materials, which has two portions made from different liner material with different propensities for sticking. This is done in order to avoid the 'stuck-to-liner' of the inner parts of the roll when winding up the liner with the uncured material.

As there could be given no hint from the prior art the subject-matter of independent claims 1 (liner), 7 (system), 10 and 13 (method) seems to fulfill the requirements of the PCT with respect to novelty and inventive step.

2. The dependent claims are concerned with further details of the invention and seem likewise to be novel and inventive.

Re Item VII

Certain defects in the international application

1. In contradiction with the requirements of Rule 6.3(b)(i) and (ii) PCT, the independent claims have not been cast in the two part form, with those features which in combination are part of the nearest prior art being placed in the preamble.
2. The technical features mentioned in the claims are not followed by reference characters relating to these features, contrary to Rule 6.2(b) of the PCT. This applies to both the preamble and characterising portion.
3. The right hand reference number '42' in Figure 3 should obviously be read as '44' (second portion).

The second end of second portion '44' has the reference number '54' in the description (see, e.g. page 4, line 18) and '48' in Figure 3.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US98/11069

The reference number '56', indicated as 'seam' in the description (see, e.g. page 4, lines 22 or 30) is not listed in Figure 3.

This deficiency should be amended.

Re Item VIII

Certain observations on the international application

The subject-matter of claims 11 and 12 as well as claims 14 and 15 (all directed to a liner) are referred to claims 10 and 13, respectively. These claims are, however, directed to a method. This inconsistency should be clarified.

The amendments with respect to items VII and VIII could be done when entering the national phases.
